

## 3D Modeling Project #20

# ARCHITECTURE

With simple shapes, you can create a **familiar-looking model** of a famous building.

### Before You Start

Go to the **Creative Suite**, open a new **PLaSM project**, and save it as **Project-20** in the folder **course-3D-projects/**.

### Project Goal

Create **simplified 3D model** of an existing famous building, or design your own! Some images for your inspiration are shown below.

The U.S. White House:

The Eiffel Tower:

The Empire State Building:

The U.S. Pentagon:

Big Ben:

And something more historical, such as a Roman aqueduct:

As always, when constructing your model, **start with the basic shapes** of your chosen building, then refine your model to more closely **reflect the geometry** of the structure.

## Project Checklist

Your project will be finished when:

1. You have **finished** your 3D model.
2. Your program is saved as **Project-20** in folder **course-3D-projects/**.
