

Price List for Schools and Libraries

NCLab courses teach essential 21st century job skills, including coding, computational thinking, 3D modeling (CAD), and visual-spatial reasoning in a game-based format. The courses are self-paced and self-graded. NCLab's game-based approach teaches soft, hard, and applied skills, preparing students for advanced, real-world applications. Teachers and librarians do not need to be experts to teach these courses. For details, please visit <https://nclab.com/>.

All prices are for a 12-month subscription. Classroom and Site Licenses include lesson plans, pacing guides, student journals, and other supporting materials in PDF form. Users also have access to cloud storage, and a Creative Suite that can be used to write their own programs, create designs and models, publish papers, and solve problems in science, engineering, and math.

Professional Development License Free

For instructors, librarians, and administrators only, the PD license includes access to all available courses and resources. The purpose is to allow instructors to learn these skills themselves, and evaluate courses and supporting materials before teaching a class.

Single Classroom License

One course for 30 students \$325

All courses for 30 students \$900

The price for all courses may be prorated for smaller groups, based on a \$100 set up fee plus \$30 per student.

School Site License (unlimited number of seats) \$2,500

Library Site License (unlimited number of seats) \$1,500

District License Contact NCLab for quotes

Training Contact NCLab for quotes regarding onsite and webinar trainings

We look forward to working with you. Please call 800-666-2024, or email office@nclab.com.
